

### **SECURE OPERATIONS**

# Rugged Durability. Leading Technology.

OP/Station® secure, customized workstations deliver reliable performance in the most challenging conditions.

**We design and build** our OP/Station industrial workstations to meet the demanding requirements of modern industrial environments. Whether you're in manufacturing, a laboratory, process control, or anywhere precision and reliability are paramount, OP/Stations ensure reliable performance in even the most challenging conditions.

### **Operate Effectively, Anywhere**

Our OP/Stations industrial workstations are not just about enduring tough environments; they are about enhancing operational efficiency and productivity. With a focus on customization and scalability, we offer solutions that can adapt to your evolving needs.

- UL Rated, Hazardous Locations: Class I, II, III, Div. 2
- Certifications: UL 508A, UL 50E, FCC Class A, CE, UL 60950 3rd Edition
- NEMA 4/12 or NEMA 4/4X/12
- Sealed to IP65/66 standards
- Purge kits; IS barriers; signal disconnects
- · UPS systems; cooling systems

### **Designs for Every Operating Environment**

We offer several standard designs for industrial workstations, each design applicable to a set of applications and environments. From these standard designs, customers may choose to add features and capabilities to meet specific needs in collaboration with our HIP (Hardware Integration Program) engineers.

### **Durability Redefined**

Built to withstand harsh conditions, including extreme temperatures, dust, and vibration.

### **Performance Oriented**

Workstations include powerful processors and graphics for demanding applications and data intensive tasks.

### **Seamless Integration**

Easy integration with existing systems, offering a range of connectivity options.

### **Modular and Scalable**

Modular design for easy upgrades and customization, to grow with your needs.

### **Designed for Safety and Efficiency**

Our OP/Station solutions are not just functional but also safe, efficient, and compliant with industry standards, making them an ideal choice for pharmaceutical and critical infrastructure applications.

### **Flexible Mounting Solutions**

We offer a variety of mounting options, such as pendant arm, wall-recessed, and ceiling mounts, catering to different spatial requirements. These flexible solutions, like the pendant arm mounts, enhance space efficiency by allowing adjustments and retraction when not in use.

### **Ruggedized for Reliability**

Our hardware, including thin clients, panel PCs, ruggedized touch displays, and mobile workstations, are engineered to withstand harsh industrial conditions.

### **Mobility and Connectivity**

Mobile workstations are a standout feature, offering the flexibility to move units as needed within facilities. Equipped with wireless connectivity and heavy-duty batteries for continuous operation, these workstations facilitate rapid reconfiguration of work environments.

## **Space Optimization for Pharmaceuticals**

Innovative design solutions ensure that even crowded facilities can efficiently accommodate essential computing platforms and visualization displays, optimizing every available space.

### **Customization for Specific Needs**

Understanding that one size does not fit all, we provide custom solutions for unique operational requirements. This customization can include specific sizes, inputs, communication connections, mounting options, and battery types.

### **Compliance and Wireless Integration**

We ensure that all OP/Station solutions are compliant with necessary regulatory standards, particularly vital in cleanroom environments. Built-in Wi-Fi capabilities allow for seamless communication, reducing the risks associated with wires in sensitive areas.

### Ready to Learn More?

Discover how OP/Station can transform your industrial workspace into a model of efficiency, safety, and compliance. Visit our website, call, or email us today.
