

Your Operational Excellence Partner

Accelerate Your Operations, with Greater Visibility, Knowledge, and Control

Your Goals. Our Guidance. Shared Success.

With over 40 years of experience as an integrator of automation and controls systems, our expertise implementing digital transformation programs, and our capabilities as a managed services provider, we understand how to design, build, and manage technology solutions that help you operate more efficiently, safely, and profitably.

Our integrated, data-centric approach delivers on the promise of data to drive operational excellence, by giving you greater visibility, knowledge, and control.

Trusted by Leading Companies

We focus on building and maintaining IT and OT systems for companies in regulated industries. That focus has given us deep industry expertise, which means we understand your business goals and how technology, intelligently deployed and managed, can help you achieve them. Our clients include:

Serving Regulated Industries for 40 Years

Life Sciences

We help life-sciences companies meet regulatory requirements and manage complex operations — from labs to manufacturing and distribution — with greater efficiency and security while ensuring data integrity.

Food & Beverage

We give food & beverage companies the power and flexibility to keep pace with rapidly changing consumer preferences while meeting demanding cost targets.

Critical Infrastructure

We deliver solutions that give critical infrastructure operators the ability to operate securely, reliably, and efficiently while minimizing downtime.

Delivering on the Promise of Operational Excellence

Operational Excellence requires the deployment of people, process, and technologies in a multi-stage journey. We help you pursue an incremental approach tailored to your company’s capabilities and goals.

Your Single Source for IT-OT Systems and Services

To help you achieve your goals, we provide a comprehensive set of services, from strategy, automation, intelligence, and infrastructure, to staffing, remote management, and ongoing support.

Service	Description
STRATEGY	
Digital Transformation	Create a strategy that aligns business goals with a technology roadmap.
Master Planning	Map needs to resources and processes, to avoid mistakes and delays
Process Mapping	Identify inefficiencies, streamline operations, ensure consistency, compliance
Secure by Design	Build infrastructure security into your operation at a foundational level
AUTOMATION	
HMI/SCADA	SCADA solutions to fit your needs: Ignition, FactoryTalk, Aveva, more
Batch Processing	Recipes, scheduling, automation, QA, traceability, compliance, more
Building Automation	Manage all your facility's systems — electrical, HVAC, lighting, security, etc.
PLCs	Upgrade functionality, enhance efficiency, streamline regulatory compliance
INTELLIGENCE	
AI/ML	Augment your automation to create a system that can both think and act
Data Analytics	Connect data sources — PLCs, IIoT, and more — for timely analysis
MES	Integrate data from PLCs, SCADA, ERP, SCM, PLM, to operate more effectively
Quality & Compliance	Digitize documentation, to increase visibility and streamline compliance
INFRASTRUCTURE	
Industrial Workstations	Reliable computing solutions for the most challenging conditions
Networking & Cybersecurity	Solutions and services to operate securely in a converged IT-OT environment
Staff Augmentation	Experienced, vetted professionals, part-time, full-time, project
Managed Services & Support	We extend your team, for remote management, analytics, more

Drive Performance, through Automation and Data

Let us help you design and deploy automation and data systems that drive increased productivity, flexibility and resilience across your entire value chain — so you can focus on what you do best.
